During the past winter and spring he has made many changes and improvements on the interior of the building and to the machinery. This week he started on the grounds surrounding which have been an eye sore to him. When he is through with what he plans our citizens will see a neat lawn, the banks on the two sides systematically terraced and sodded, posy beds here and there and some shrubbery on the premises, in fact the place will take on a decided change and will be much more attractive than ever before and we need not be ashamed to invite visitors of our little city to see the plant.

George is no sluggard but is up and doing something all the time.
